#### 2. Brezpotja, zavarovane poti in via ferata (Scrambling and Via ferata)

Slovenija je ena redkih držav, ki ločuje zavarovane poti in športne ferate (via Ferata). Športne ferate so športni objekti, ki se običajno nahaja blizu ceste, in so predvsem osredotočene na okretnost gibanja in atletsko pripravljenost posameznika. Nekateri jih koristijo celo za popoldansko rekreacijo. Glavna značilnost športnih ferat je, da je jeklenica neprekinjeno napeta od začetka do konca, ne glede na težavnost vzpona. Zavarovane poti pa se predvsem nahajajo v hribih in običajno vodijo na vrh. Speljane so čez najlažje možne prehode. Za razliko od športnih ferat pri zavarovanih poteh jeklenica ni neprekinjeno napeta od začetka do konca, pač pa samo na mestih, kjer se jo (iz varnostnih razlogov) najbolj potrebuje.

Največje razmerje vodnik : gost je 1 : 4, v nekaterih primerih 1 : 2. Cena od 300 € dalje.

ANGL: Slovenia is one of the few countries that separates protected trails and sports ferratas (via Ferata). Sports ferratas are sports facilities that are usually located close to the road and are primarily focused on agility of movement and athletic readiness of the individual. Some even use them for afternoon recreation. The main feature of sports ferratas is that the steel cable is continuously tensioned from start to finish, regardless of the difficulty of the ascent. Protected trails, however, are mostly located in the mountains and usually lead to the top of the mountain. They are led over the

easiest possible crossings. Unlike sports ferratas, cable present in protected trails is not continuously tensioned from start to finish, but only in places where it is most needed (for safety reasons).

Max. 4 clients per guide in some cases, max. 2 clients per guide. Price starting at 300 €.

Brezpotja so nemarkirane poti. Običajno zametki poti lovcev ali živali, ki se po najlažjih prehodih prebijajo čez teren. Brezpotje je lahko tudi bolj ali manj izpostavljeno, predvsem pa na takih poteh običajno ni množic, kar jim daje poseben čar.

Občutek, ko dereze zarežejo v trdo snežno ali ledno podlago, in vsak udarec s cepinom pomeni trdno točko oprijema, je res nekaj posebnega. Večino smeri, ki se v hribih plezajo poleti, se lahko pleza tudi pozimi. Le bolj zahtevno je. Nekatere smeri pa je zaradi terena, po katerem smeri tečejo, bolj priporočljivo plezati pozimi.
